Flexible Cost Efficiency

Delivery When You Need It

A-Series General Industry Lifts

Improve ergonomics and productivity inexpensively with the A-Series Lifts. These cost efficient lifts, powered by Herkules patented Air Bag™ technology, raise pallets, bins and other materials to your desired working height.

Various optional components are offered providing you with tremendous flexibility. Tilts, rotates, conveyors, and other parts can be added when you first purchase a lift or later when you need them. The A-Series Lifts offer solutions for hundreds of different applications.

Very few components make up an A-Series lift. Each high strength steel part is powder coated for maximum performance. This innovative "bolt together" design provides an affordable ergonomic solution with rugged durability.

There are really only 6 major components to every A1050 lift. Since each part is bolted on, it is extremely simple to replace any part or option if needed.

Foot or Hand Controller
Choose the controller that best fits your needs.

The A1050-30 is shown with an optional top plate. Standard lift color is orange.

Herkules Air Bag™ Technology

100% Air Operated - No hazardous electrical connection is required
- No messy hydraulic oil or other fluids are used
- Uses central air supply

Maintenance-Free - No costly cylinders to maintain and replace
- The patented air bag technology provides all the power minimizing wear on the scissors, providing an extremely long lasting lift.

The Rotate Option

A rotation package allows easy access to all 4 sides of the material, improving ergonomics while loading and unloading. Spring detents are also an option for fixed stop points.

Add the Rotate Later

The Tilt Option

Add a Tilt package in order to place materials at the optimum height and angle. Tilts up to 45 degrees. The Tilt option can also be used as a stand alone bolted directly to the floor.

Add the Tilt or Skirt Later

The Skirt Option

The Top Plate Option

Increase the lift's flexibility by adding a standard Top Plate 51" x 51", 1/4" thick. Custom top plate sizes are also offered. A stainless steel top plate is an option for food processing applications.

Add the Top Plate with or without Retaining Corners Later

The Retaining Corners Option

The Conveyor Option

A conveyor package allows you to integrate a lift & conveyor with your material handling system.

Add the Conveyor Later

The Portable Casters Option

Four heavy duty casters & two foot brakes provide easy and safe mobility for your materials. This option is available for lifts with 3000 lb capacity and under.

Add the Casters Later

The Portable Dolly Option

Easily move the lift wherever you need it with wheel attachments and a dolly handle. Any capacity lift can be modified with this portability kit.

Add the Portability Kit Later

The A1010 Offers a Smaller Footprint

Herkules A-Series Small Footprint lift allows you to roll a cart of material over the lift, and raise the cart to a desired working height.

The A1300 High Rise

Herkules A-Series High Rise lift provides more flexible travel than the basic A1050, up to 42".

A-Series General Industry Lifts

The A1010

Capacity	Dimensions	Closed	Travel	Raised
3,000 lbs	20" x 37.5"	7"	12.75"	19.75"

The A1050

Model #	Capacity	Dimensions	Closed	Travel	Raised
A1050-10	1,000 lbs	35.5" x 43.75"	7"	25"	32"
A1050-20	2,000 lbs	35.5" x 43.75"	7"	25"	32"
A1050-30	3,000 lbs	35.5" x 43.75"	7"	25"	32"
A1050-40	4,000 lbs	35.5" x 43.75"	7"	25"	32"
A1050-60	6,000 lbs	35.5" x 43.75"	7"	25"	32"

The A1300

Capacity	Dimensions	Closed	Travel	Raised
3,000 lbs	35.5" x 43.75"	9"	33"	42"

Options Offer Flexibility

The A-Series Lifts are extremely versatile due to the multitude of options available for creating the ideal ergonomic lift for your material handling needs.

Any option can be easily added to an A-Series Lift. If your needs change, you can remove one option and add another, without replacing an entire lift. This can drastically reduce future equipment costs.

Herkules Equipment Corporation

Herkules Equipment Corporation is the leading manufacturer of high-capacity, air-operated lifts. For more than 25 years Herkules lifts have been recognized worldwide for lifting capacity, durability, flexibility and ease of use.

Lifts powered by Herkules' patented Air-Bag™ technology are clean, environmentally friendly, and virtually maintenance free. The heavy duty air bags are built for rugged daily use, giving your facility a lifetime of trouble-free operation.
